

REGALION delivers support for the Gambling Act 2005 for less than £3000

Cintra is pleased to offer its latest solution as part of the Regalion (Regulation and Licensing Online) family of products.

The Gambling Act 2005 comes into force on 21st May 2007 and Regalion now provides the ability to handle premises applications under the new legislation. Licensing Authorities and Boards can process hard copy applications and enable applicants to submit applications online from their workplace or at your offices greatly reducing the administrative burden, particularly during the transitional arrangements when the majority of applications will be submitted. Applicants can also pay for their application online. In line with other licensing legislation Regalion automatically publishes the public register of licences granted enabling compliance with statutory obligations.

The applications that are supported in this release are

- Premises Licence (Transitional Conversion Application).
- Premises Licence (Standard Application)
- Provisional Statement (Standard Application)
- Vessel Licence (Transitional Conversion Application)
- Vessel Licence (Standard Application)
- Vessel Licence (Provisional Statement)

Gambling Act applications are managed using Regalion's extensive features including

- An administration layer providing end to end functionality for applications received on paper and electronically.
- An intuitive rules based workflow mechanism simplifying the workload for Licensing Officers
- Ability to retrospectively process applications submitted on paper
- Capture and print of "licence as granted" including conditions and premises' plans.
- Data for licence "as applied for" and "as granted" facilitates analysis and comparison.
- The ability to query licences granted by time/licensable activity
- Maps and Aerial Photographs for entries on the Public Register

To enable you to meet the legislative timetable Cintra are offering Regalion for Gambling Act 2005 on a fully hosted managed service for £2999.
